

Spilt coffee on your new sofa – so what?
B-Guard™

Protection against stains on upholstery and decoration fabrics by Baumann Dekor

Lean back and relax – stain removal as easy as it can be

You all know it from your own experience: by and by, surfaces tend to stain and even with the greatest care you cannot avoid stains. Alternatively, you could protect your furniture with plastic covers or choose only colours which make stains less apparent.

Now **Baumann Dekor's B-Guard™** offers the **perfect solution** for private homes as well as for hotels, restaurants, casinos, etc. The natural staining process is slowed down and the fabrics keep their clean appearance for a longer period of time.

B-Guard™ is a technology that can be applied on almost **any of our standard and Trevira-CS fabrics**. I.e. you can select from the whole range of Baumann Dekor's designs and colours.

If ever a mishap occurs: immediately remove the liquid, which will not penetrate the fabric, using a clean, soft cloth. If eventually a stain has dried, rub using a soft brush, then moisten using a soft cloth until the stain is gone.

B-Guard™

- Protects upholstery fabrics against oil, water, and stains
- Is almost permanent (up to 10 washing cycles)
- Can be combined with most of our standard and flame-retardant fabrics
- Can be combined with **B-Fresh™** to additionally protect the fabric against absorbing bad odours
- Its effectiveness has been proven in independent tests
- Prolongs the product's life cycle, particularly in public areas, restaurants and bars
- Helps to reduce cleaning costs
