

## Textile phantasy for phantastic cruise lines Color Line – M/S Color Fantasy, Oslo (N)

M/S Color Fantasy, the world's largest cruise ship with car decks, has set a new standard – not only with regard to technical features, but also in terms of interior design.

Flame retardancy of course is a must in this business. But compliance with the stringent international safety standards must be invisible. The fabrics used to decorate and equip entertainment and shopping facilities, conference rooms, restaurants, bars, cabins etc. must make the traveller feel comfortable – this distinctive atmosphere onboard the M/S Color Fantasy is created by the exclusive fabrics of Baumann Dekor used for curtains, bed covers and upholstery.

Such challenging projects can be carried out only with the necessary competence and flexibility. This is guaranteed by our experienced project managers, in-house design and development combined with end-to-end production facilities including weaving, printing, dyeing, and finishing.

These factors enable us to supply fabrics and services within short delays. Moreover, we assist our partners - designers, architects, contractors, operators or other - throughout the complete project with professional planning, service and consulting.

The feedback from our customers proves us right: these comprehensive solutions tailored to their particular and individual demands is exactly what they need.

*"For many, many years, we have been cooperating with Baumann Dekor on different projects to our full satisfaction. The reasons why they are precious partners in the challenging field of cruise shipping industry are numerous: they react quickly to all our requests with regard to colour and design; they deliver excellent quality in compliance with the stringent requirements imposed by our customers.*

*Another extreme advantage for us is their huge archive with plenty of designs, patterns, textures and colours from which we can choose - and if they don't have a particular design, they have the potential and flexibility to develop and produce it at short notice."*

Eija Uusitalo, Finlayson Oy - Key Account Manager Marine Contract Export
