

It is a very ambitious goal all the Marriott hotels in the world are striving to achieve: to be among the best when it comes to providing a luxury and generous atmosphere combined with excellent services focused on the guest's individual wishes. A goal they also ask their suppliers to comply with.

We at **Baumann Dekor** obviously are up to these standards as we have been awarded the contract not only for the refurbishment of all 281 rooms and 32 suites of the Marriott in Vienna but also of the public areas. Our curtains, drapery and upholstery fabrics meet the stringent requirements of the hotel management in terms of design, colour, quality, functionality, safety, and price.

As usual, we set great store on competent, individual advice and assistance in every project phase, from the first pre-definition of colours and patterns to the final stitches and installation. The development of special designs for each of the rooms, suites, etc. to support the hotel's corporate identity is carried out rapidly and with high flexibility.

Many years of experience in contract business combined with in-house design and development and end-to-end production facilities (including weaving, printing, dyeing, finishing) enable us to meet even challenging customer time frame expectations.

Our customer's feedback shows that our tailored comprehensive solutions are a perfect match with the particular requirements:

„After working with Baumann Dekor for many years I must say that we are extremely lucky to have such a reliable and competent partner dedicated to meeting our wishes. Moreover, their understanding of hotel business is a precious asset. They even meet our special requirements with regard to design and colour which must comply with the international Marriott standard with high professionalism and flexibility. Besides the outstanding quality and longevity of their fabrics we also highly appreciate the competent advice and support as well as the compliance with delivery schedules.“

Dieter Fenz, GM Marriott Hotel, Vienna
